MV500
METERING VALVES
Positive Displacement Metering

Advantages

- Simple to install
- Quick and easy calibration of the quantity
- Minimum accuracy of ± 2%
- Part in contact with the stainless steel fluid
- Opening and closing control (faster)
- Potential rate: greater than 600 cycles / minute
- No residual drop at the end of the cycle

The MV500 is a true positive displacement metering valve capable of dispensing deposits of material in a highly accurate process.

The deposit volume is determined by the metering cylinder’s stroke adjustment setting and is not affected by variations in viscosity or material pressure. The MV500 is compatible with all PVA automated platforms.

The MV500 has many integrated features including:

- 0.10 cc to 1.45 cc shot size
- Reduced fluid volume inside valve for increased repeatability
- Front closing dispense valve on outlet check for accurate shutoff
- Stainless steel fluid section for optimum material compatibility
- Adjustable dispense rate
- Micrometer adjustment permits shot size modification
- 5:1 pressure advantage on metering cylinder
- Optional limit sensors for “ready to dispense” and “dispense complete” feedback

Compatible products

Adhesives / Activators / Lubricants / oils / RTV / Epoxies / Solvents / Alcohols / Fluids / Inks / Paints

PDS S.A.S is a French company that commercializes a wide range of dosage equipments, proven and effective.

Distributed in over 20 countries around the world, these equipments provide tailored solutions to many users in order to improve technically their manufacturing and reduce their productions costs.

Our collaborators and sales engineers all have a strong technical competences. They are able to answer your questions and offer you, after analysis, the right solution for your particular need.
